

# Easy Open Gate Latch Installation

## Tools Required

Phillips Screwdriver

Recommend 1/8" pilot holes for all screws

1. Attach latch to side of gate with two screws

3. Mount strike bar to front of latch using the lower hole. Use screw with shoulder.

2. Secure latch to front of gate with two screws

4. Place strike plate on gate post and align padlock holes with latch. Install three screws. Slots allow vertical adjustment.
